Dear Mr. Director,

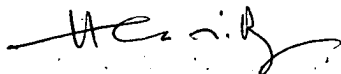

I am referring to my above-mentioned patent application pending at U.S. Patent Department 09 months for patent process.

May I approach you this time asking for its status; when I expect to have your approval for patent issue and to know how long it takes for a patent issue from its time of an application ?

Would you please let me have an idea on the time of its approval ? So that I may prepare its patent fee or may I move forward to license the invention material for business contract even if the application is still pending at your office before approval?

Thank you for your time to grant me an early reply.

Respectfully,

Henri Duong
